

# **The Futures Trading Symbols And Contract Specifications Handbook**

Compiled by Art Christian and John Prow  
Authors of The Power Trade System

We compiled this handbook, because when we first started trading, this information was always very elusive. Even finding the trading symbol for a futures contract you would like to trade on the website of your broker or charting service can at times be almost impossible.

Also, you need to know the exchange the future trades on, the value of each point, the unit trading size, the hours it trades and more. We hope this handbook will be as useful to you as it has been for us.

If you are interested in making your living by day trading the market, we have developed a trading system that is easy to learn, easy to use and it works in real time, not after the fact as so many systems do. It's called *The Power Trade System*. Do yourself a favor and go to <http://www.powertradesystem.com> and check it out.

## Ways To Use This Handbook

If you do not wish to print out the entire handbook, just print out the pages of the futures contracts you are interested in trading.

If you print the entire handbook, three hole punch the pages and place them in a three ring binder. To make it easier to locate the sections you are interested in, use tabbed dividers between each section.

Or, you can simply click on the next page button on the Adobe Reader until you get to the futures contract you wish to lookup, and never print anything out.

## Trading Month Codes

Jan = F    Feb = G    Mar = H    Apr = J    May = K    Jun = M

Jul = N    Aug = Q    Sep = U    Oct = V    Nov = X    Dec = Z

Cash or Spot price (no year, usually) = Y
